DETAILED ACTION

Response to Arguments

1. Applicant's arguments filed April 17, 2006 with respect to claims 26-29 have been fully considered and they are not persuasive. It is notoriously well known that severe weather conditions adversely affect activities that can be influenced by the weather. Indeed, severe weather conditions including hurricanes, tornados, lightning storms flooding etc. result in admonitions not to travel and to avoid areas that are severely impacted by the weather conditions. It would be obvious to one of ordinary skill in the art to take weather conditions into consideration when responding to a biological attack.
2. Applicant's arguments made with respect to claims 30-36 have been considered but are moot in view of the new grounds for rejection.

Claim Rejections - 35 USC § 103

3. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 26-29 are rejected for the reasons cited in the previous office action mailed October 18, 2005.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 US PQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Iannace*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 30-36 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 11 of copending Application No. 104222708. Although the conflicting claim is not identical, they are not patentably distinct from each other because both applications claim a remedial method in response to a biological attack comprising establishing identical exclusion zones (exclusion, contamination reduction, and support zone. Regarding claim 30, the instant application includes the additional step of monitoring weather conditions at the site.

It is notoriously well known that severe weather conditions adversely affect activities that can be influenced by the weather. Indeed, severe weather conditions including hurricanes, tornados, lightning storms, flooding etc. result in admonitions not to travel and to avoid areas that are severely impacted by the weather conditions. It would be obvious to one of ordinary skill in the art to take weather conditions into consideration when responding to a biological attack. Claims 31-35 list weather conditions that are well known in the art of weather forecasting. It would be obvious to one of ordinary skill in the art to take these conditions into account and to establish conditions of readiness based on the conditions as cited in claim 36.

5. This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
